

## Lehmann&Voss - Complex-Ester

| Product                | Chem. Description                | Features and Benefits   |
|------------------------|----------------------------------|---|
| <b>LUVODUR ES 4860</b> | Trimethylolpropane Complex Ester | Good thermal and oxidation stability. For high temperature chain oils. Improves rheology properties. Very low evaporation tendencies (Noack). Vk40: 100 mm <sup>2</sup> /s.     |
| <b>LUVODUR ES 4861</b> | Trimethylolpropane Complex Ester | Good thermal and oxidation stability. Improves rheology properties. Soluble in mineral oils. Good lubricity. Vk40: 50 mm <sup>2</sup> /s.                                       |
| <b>LUVODUR ES 4862</b> | Complex Ester                    | Good thermal, oxidative and hydrolytic stability. Rheology modifier in MWF concentrates and neat oils. Soluble in mineral oils. Good lubricifier. Vk40: 440 mm <sup>2</sup> /s. |
| <b>LUVODUR ES 4863</b> | Complex Ester                    | Saturated viscosity modifier for all applications, thermo-oxidative stability. Very high viscosity index >300. Vk100: 1200 mm <sup>2</sup> /s.                                  |
