

<b>Products</b>	<b>Description</b>	<b>Application</b>
<b>LUVOGEL® W1</b>	Montmorillonite	LUVOGEL® W1 is used in water-based formulations, e.g. adhesives, paints and coatings, cleaning agents, polishes, etc. It produces a pseudoplastic flow profile with thixotropic properties and improves settling behavior and flow control.
<b>LUVOGEL® W3</b>	Montmorillonite	LUVOGEL® W3 is used in water-based formulations, e.g. adhesives, paints and coatings, cleaning agents, polishes, etc. It produces a pseudoplastic flow profile with thixotropic properties and improves settling behavior and flow control.
<b>LUVOGEL® AQ</b>	Synthetic Hectorite	LUVOGEL® AQ is mainly used as a rheological additive in water-based formulations. The main areas of application are industrial coatings and automotive paints - OEM as well as After-Market. The products provide excellent stabilisation and orientation of effect pigments.
<b>LUVOGEL® W2N</b>	Synthetic Hectorite	LUVOGEL® W2N is mainly used as a rheological additive in water-based formulations. The main areas of application are industrial coatings and automotive paints - OEM as well as After-Market. The products provide excellent stabilisation and orientation of effect pigments.
<b>LUVOGEL® WS1</b>	Synthetic hectorite	LUVOGEL® WS1 is a synthetic smectite clay modified by an inorganic sodium phosphate. It is used as a rheological additive in water-based formulations.
<b>LUVOGEL® WS2</b>	Synthetic hectorite	LUVOGEL® WS2 is a synthetic smectite clay modified by an inorganic sodium phosphate. It is used as a rheological additive in water-based formulations.
